My Complete Cybersecurity Repository

1-YouTube Channels

1. Ebrahem Hegazy
2. cyber guy
3. CyberBugs
4. Racoon راكون
5. daoud Youssef
6. Muhammed Talaat
7. Loi Liang Yang
8. Motasem Hamdan
9. RanaKhalil
10. PwnFunction
11. gotr00t?
12. Low Level Learning
13. Black Hat — Technical cybersecurity conferences.
14. Bugcrowd — Bug bounty methodology and interviews.
15. Professor Messer — Guides covering certifications.
16. Nahamsec — Educational hacking and bug bounty videos.
17. Computerphile — Covers basic concepts and techniques.
18. InsiderPHD — How to get started with bug bounty hunting.
19. Cyber CDH — Cybersecurity tools, tactics and techniques.
20. John Hammond — Malware analysis, programming, and careers.
21. SANS Offensive Operations — Technical cybersecurity videos.
22. HackerSploit — Penetration testing, web-application hacking.
23. IppSec — Labs and capture-the-flag tutorials, HackTheBox etc.
24. Pentester Academy TV — Discussions and demonstrating attacks.
25. DEFCONConference — Everything from DEF CON cybersecurity event.
26. STÖK — Videos on tools, vulnerability analysis, and methodology.
27. Simply Cyber — Helps people with cybersecurity career development.
28. Black Hills Information Security — Everything cybersecurity related.
29. Joe Collins — Everything Linux related, including tutorials and guides.
30. Null Byte — Cybersecurity for ethical hackers, and computer scientists.
31. LiveOverflow — Involves hacking, write-up videos, and capture-the-flags.
32. The PC Security Channel — Windows security, malware news, and tutorials.

2-Search Engines

1. Dehashed—View leaked credentials.
2. SecurityTrails—Extensive DNS data.
3. DorkSearch—Really fast Google dorking.
4. ExploitDB—Archive of various exploits.
5. ZoomEye—Gather information about targets.
6. Pulsedive—Search for threat intelligence.
7. GrayHatWarfare—Search public S3 buckets.
8. PolySwarm—Scan files and URLs for threats.
9. Fofa—Search for various threat intelligence.
10. LeakIX—Search publicly indexed information.
11. DNSDumpster—Search for DNS records quickly.
12. FullHunt—Search and discovery attack surfaces.
13. AlienVault—Extensive threat intelligence feed.
14. ONYPHE—Collects cyber-threat intelligence data.
15. Grep App—Search across a half million git repos.
16. URL Scan—Free service to scan and analyse websites.
17. Vulners—Search vulnerabilities in a large database.
18. WayBackMachine—View content from deleted websites.
19. Shodan—Search for devices connected to the internet.
20. Netlas—Search and monitor internet connected assets.
21. CRT sh—Search for certs that have been logged by CT.
22. Wigle—Database of wireless networks, with statistics.
23. PublicWWW—Marketing and affiliate marketing research.
24. Binary Edge—Scans the internet for threat intelligence.
25. GreyNoise—Search for devices connected to the internet.
26. Hunter—Search for email addresses belonging to a website.
27. Censys—Assessing attack surface for internet connected devices.
28. IntelligenceX—Search Tor, I2P, data leaks, domains, and emails.
29. Packet Storm Security—Browse latest vulnerabilities and exploits.
30. SearchCode—Search 75 billion lines of code from 40 million projects
31. Citizenlab
32. Wikileaks
33. Hackread
34. Threatpost

3-News Resources

1. IT Security Guru
2. Security Weekly
3. The Hacker News
4. Infosecurity Magazine
5. CSO Online
6. The State of Security - Tripwire
7. The Last Watchdog
8. Naked Security
9. Graham Cluley
10. Cyber Magazine
11. WeLiveSecurity
12. Dark Reading
13. Threatpost
14. Krebs on Security
15. Help Net Security
16. HackRead
17. SearchSecurity
18. TechWorm
19. GBHackers On Security
20. The CyberWire
21. Cyber Defense Magazine
22. Hacker Combat
23. Cybers Guards
24. Cybersecurity Insiders
25. Information Security Buzz
26. The Security Ledger
27. Security Gladiators
28. Infosec Land
29. Cyber Security Review
30. Comodo News
31. Internet Storm Center | SANS
32. Daniel Miessler
33. TaoSecurity
34. Reddit
35. All InfoSec News
36. CVE Trends
37. Securibee
38. Twitter
39. threatABLE
40. Troy Hunt's Blog
41. Errata Security
42. threatpost

4-Training Platforms

1. HackXpert
2. TryHackMe
3. CyberSecLabs
4. Cybrary
5. LetsDefend
6. Root Me
7. RangeForce
8. Certified Secure
9. Vuln Machines
10. Try2Hack
11. TCM Security
12. EchoCTF
13. Hack The Box
14. Vuln Hub
15. OverTheWire
16. PentesterLab
17. PortSwigger
18. Picoctf
19. Cybertalents
20. exploit3rs
21. w3challs
22. hackthissite
23. cyberdefenders
24. ctflearn
25. overthewire
26. ctftime
27. defendtheweb
28. seedsecuritylabs
29. googleCTF
30. pwncollege
31. hack-yourself-first.com/
32. wechall
